

Diploma in Technology Management in Agriculture (DTMA):

The One-year Diploma in Technology Management in Agriculture (DTMA) is a two-semester course, jointly offered by the two leading institutions of the country on a distance learning mode. It offers an excellent opportunity to systematically study the subject of Technology Management in Agriculture along with intricacies and ingenuities of building and managing intellectual property. The aim of the course is to build and foster the skills of students, researchers, policy makers, IP and technology transfer practitioners as professionals to enable them to successfully hold executive positions in intellectual property and technology management assignments in agriculture and related industries.

The course is well-structured to create a 'bridge professional' for innovation management and global understanding who can identify, develop and manage IP assets for leveraging them for technology transfer and commercialization in agriculture and related industries.
